FROM THE PRINCIPAL'S DESK

DR. M. UMA
Principal

Change is the basic law of nature. But the changes wrought by the passage of time affects individuals and institutions in different ways.

Children are like buds in a garden and should be and lovingly nurtured as they are the future of the nation and the citizens of tomorrow. No subject is of greater importance than that of education. Vidhya Nikethan Intel Public School are continually working in this direction by providing value based education and laying special emphasis on character building and upholding high moral values. I am sure that our school would continue to make a significant contribution in educating the students in such a manner so that they would face the future challenges boldly in their life.

Needless to say, the pandemic has transformed the centuries – old, chalk – talk teaching model to one driven by technology. This disruption in the delivery of education is pushing educationist to devise ways to drive engagement while ensuring inclusive e-learning solutions. Thus, a multi - thronged strategy is needed to tackle the crisis and charter out a robust education system for long term use

CELEBRATIONS & ACTIVITIES

Children's day celebration

In India, children's day is celebrated on 14th November every year to commemorate the birth anniversary of our first prime minister, Pandit Jawaharlal Nehru. He loved children dearly and is fondly remembered as Chacha Nehru by them.

We celebrated this day with joy and fully appreciated the gift of childhood that has been given to us. However let us also remember the great responsibility that is ours towards this society and a better India. When incorporated into children's services appropriately, celebrations can be used to bring people together, to create a feeling of belonging and to develop a sense of community amongst families educators and children.

Fancy dress competition

The journey with the students so far has been very exciting and our staff puts it's best efforts to find out the hidden qualities of each and every student. It is very important to boost up the confidence level of the students so that issues such as stage fear not fixing with others, commend on the language etc, is totally eradicated from an early age. Our staff are always determined handle the children feel at home so that they are comfortable in interacting with teachers. Our little blooms spreaded their magic by displaying their talents.

Science Expo

It is the age of science. There are many wonder of science. Science plays an important part in our daily life. It has made our life easier and more comfortable. Science is nothing but a systematic way of knowledge and living. Man's qualities of curiosity, alertness and keen observation of change in natural happenings has given birth to science and scientific study.

The modern age is the age of science. There are many wonders of science. The most useful gift of science is electricity. It runs industries, factories, etc. All our home appliances run on electricity. The discovery of medicines and vaccines has helped to cure many dreadful diseases. Trains, buses, cars, aeroplanes and ships have made our travel easier and more comfortable. The discovery of Mobile, internet, T.V., etc. have reduced the distance between people. Science has brought tremendous progress in the agricultural sector. The computer is the most wonderful invention of science. Science is the greatest boon to the modern world. We must ensure the proper use of the inventions of science in order to save the world from the dark side of science.

Modern civilization is the contribution of science. That we have got the present world through step by step development age by age is mainly the scientific development. We enjoy the fruits of thousands of scientific inventions in our everyday life that was possible by untiring efforts of many scientists from time immemorial. There is no sphere of life which has not been enriched by the blessings of science. The wonders of Modern science have dazzled man's eyes when man had to travel either on animal's back or on foot.

In conclusion, Science is beneficial and destructive at the same time for humanity. Hence, it must be correctly used for the bigger benefit of mankind. We need to ensure the clever use of these scientific devices in order to save the earth from the harmful side of science. Science is a wonderful gift to humanity, we should not distort it.

STUDENTS TALK

Deekshetha sri H
(Standard - XII)

I am studying in Vidhya Nikethan Intel Public school. It is one of the best school in our town. My school teachers are very kind and teaching us to follow the discipline. Our school has lots features such as a computer lab, Science Labs, a large chemistry, large playground, a beautiful stage, etc. The campus of my school is very clean. The play ground at my school is huge and we play a lot of sports there. Every student who comes here receives a good education. The clean and positive atmosphere of our school impires us to study. My school principal is so humble that we can easily talk to her and we never hesitate if we have to discuss something. I love to go to my school. I am studying here from 6th grade. My school aims for producing educated well –mannered and productive citizens for the nation.

PARENT'S TALK

D. AANANDHI
Parents

I am the parent of A Dharshyanth of Grade VI. I am really happy about my son's school experience at Vidhya Nikethan Intel Public School. I am glad to use this opportunity to express my gratitude to all the teachers who have been supporting and motivating my son to be what he can be in the future. We don't believe that education is a mere acquisition of knowledge. It is an opportunity for each child to analyze where they are in life and realize who they can be in the future. I believe that the school is providing ample opportunities for students to actualize these objectives. I am grateful to the school for the fascinating atmosphere of the school campus and the quality time the teachers provide to our children in and out of the classrooms. I believe that the school in addition to improving the academic standard of the students will also focus on creating a generation that will be bold enough to face the challenges in life.

TEACHER'S TALK

N. RAMACHANDRAN Tamil Teacher

I am glad to be a part of Vidhya Nikethan Intel Public School as a tamil teacher. Being a teacher is a great responsibility that impacts the present and future of children and the country. I grieve the recent unfortunate incidents and issues associated with school children and educators. Every school should ensure a conducive environment in which students can enjoy their lives and carry out their academic tasks in a decent and acceptable manner without any sort of enforcement. We strive to impart not only academic knowledge but also a range of values to each and every child entrusted to us.

I always try to involve students in the assessment process. Involving students in the assessment process is a key way of helping them to manage and take ownership of their learning, as well as think about what they have achieved and plan ahead. With the guidance of our management and support, we promise to work with sincerity and dignity and to provide our students with the best learning environment that promotes effective learning. A good teacher is like a candle. Every teacher wishes to be looked upon as a guide, a mentor, a friend, and a selfless abode of love and care. We also aim to help children develop pleasing character, leadership qualities, comradeship, discipline, and ideals of selfless service. If parents, teachers, and students work together and collaborate, it will be easier to achieve the objectives of the academic year. Let's, together, make learning an enriching experience.
