MONTH - SEPTEMBER | ISSUE - 05 | YEAR - 2022

FROM THE PRINCIPAL'S DESK

**DR. M. UMA**  
Principal

Welcome back to the 2022-2023 school year! We hope that you are healthy and well, and were able to enjoy special times with loved ones. . It is an honor to serve you as I begin this school year as your Principal of Dr. M. UMA. I look forward to a productive partnership with our families this year, as we believe that a strong home and school connection is paramount to each students' academic and social/emotional success.

Discipline is defined as the practice of training oneself to obey rules or to be systematic in life. It's a word that we often hear every once in a while, and many times we fail to understand its Importance. Discipline is a practice of self-control that is reflected in a person's actions. These Controls cannot be forced on an individual but they should be cultivated from within. Hence Discipline is considered to be spontaneous and not mere submissive to authorities in an Obedient manner.

Children can learn self-discipline by observing their parents.

Parents should be a good example and teach their children about the value of discipline in life. In schools, the principal and the teaching staff play an important role in applying discipline. The first thing students can do to be disciplined on school premises is to follow rules and Regulations properly.

## September Newsletter

Being disciplined at school is not complicated as it consists of doing Small acts like wearing a clean uniform, respecting teachers, completing the task without delaying it, wearing Polish shoes, and soon. Students who have been disciplined in their lives from an early age will help to be always organized which in turn will help them to succeed in life. If a student shows indiscipline in completing his task and as a teacher, if you think punishing and imposing a strict penalty on him will help in cultivating discipline, then you are wrong.

If a child is not disciplined, it does not mean it's completely his fault. Sometimes it could be the Fault of parents and teachers as well. Children learn by observing their surroundings whether It's good or bad. So, the first step involves all the parents following discipline. The second step involves the parents knowing their child's daily activities or routine. It means to know if the Child is going to school, doing his homework properly, and enjoying his life this will, in turn, help the parents to understand their child in a better way.

To conclude, I would like to say that it is important for students to be self-disciplined in life. It is considered to be the first step to being successful in life and if the students develop the Habit of self-discipline and self-control it would help them to plan their life accordingly and Succeed.

### CELEBRATIONS & ACTIVITIES

#### **Teacher's Day - 5th September.**

5th September is observed every year as Teachers' Day. This is Dr. Sarvepalli Radhakrishnan's birthday. He was a great teacher, philosopher, and scholar. He became the first Vice President and second President of India. His birthday is deemed most appropriate as this Teachers' Day. This day has a deeper sense. It is the day to show honour and respect to the teachers for their service to the students. Teachers are role models for their students. Teachers play a key role in shaping students future. They always show us the best path in our life. Classes are not usually held on Teachers' Day. Classrooms are decorated with flowers and festoons. Students organize various cultural programs on this day. The teachers are garlanded and given gifts by their students. Students extend their sincere gratitude to their beloved teachers. Teachers' Day is a special occasion to celebrate and enjoy the relationship between teachers and students.

Teachers' Day reminds the importance of teachers in society. It is a day to honour the invaluable contribution of teachers in our life and society. Teachers play a very significant role in a student's life. Teachers are the ones who ignite the minds of the youth. They are the main pillars of a sound and progressive society. They make us strong enough to stand on our own feet and face any challenge. Teaching is a profession that teaches all other professions. A teacher is not just an instructor but also a friend, a guide, and a philosopher who not only imparts knowledge but also gives us moral and spiritual values for life. It is rightly said that teachers are the real builders of the nation.

## September Newsletter

Special programs are organized in schools, colleges, and other educational institutions on the occasion of Teachers' Day. Schools and colleges are beautifully decorated by the students on this day. Students sing, dance, perform dramas, recite poems to express their sincere gratitude towards their teachers. On this day teachers are honored with various awards. Many students make the day even more special by handing teachers handmade gifts or greeting cards. Teachers' day is a celebration of the special bond between children and their mentors who influence their lives in numerous ways. It is impossible to imagine an ideal society without the contribution of Teachers.

### Eye Foundation Camp - 13 Th September

The school organized an Eye Checkup Camp for the students who wear spectacles and for the Support Staff to keep them updated on the correct eye vision.

The camp was organized in the school campus by the team of experts from Optometry Department of VIDHYA NIKETHAN INTEL PUBLIC SCHOOL .

Moreover, a set up for minor EYE operations was also arranged in a sanitized room. The Principal and Teachers committee let us know that the camp handled a total number of 150 Students above at free of cost.

Our school organized a free eye camp for the students during the one day. All the students and the people living nearby them came to this camp organized for check up.

Many people benefitted from this camp. People who were diagnosed with some problems of eye were given medicines and spectacles. The check up was free of cost. The organizers also distributed packet lunch to the visitors. It was a very benefiting camp especially for the poor people who could not afford to go to private hospitals for eye check up. It was a indeed a successful camp.

## Sports Meet

A major role in my life would definitely be sports. It is almost as if I look up to sports because I could not live without them. Sports pretty much define me as me. I love to play sports as well as watch all kinds of sports on T.V. and if I could ever go to a game and watch the players play live I would be thrilled. Basically sports define me because I am ambitious, I finish what I start, I set goals for myself, and I am a fierce competitor in which I love to win and I hate to lose. The greatest part about sports to me is living for the moment when the game is on the line and the pressure is on can you come through and make a play for your

### Zonal level competitions ;

## STUDENTS TALK

### V. C. MATHAN

Grade - XII

I was glad to be a student that our Vidhya Nikethan Intel Public School has given mutual importance for our Education and our talents to show others. Our school has appointed many skill-based teachers. The Teachers are kind and they teach the lesson humbly. They also teach the proper way of studying which makes our students to score more marks. The Non-Teaching staff are also doing their work perfectly . The leaders of the school are maintaining discipline across the campus. Our school gives equal importance for Sports also. Our school seniors are the role model to the juniors. They teach discipline and way of behaving in school.

Our School offers a smart class that is used for teaching lessons and programming skills. It is very easy for those students to understand who are practical based learners.

They give us the lab facility for subjects to practically understand the lessons.

#### • Instructions for parents

1. Contact the respective class teachers for any queries and suggestions.
2. Encourage your children to speak English even at home.
3. Check the school diary for students' homework and other information sent by the school.
4. Use the diary to pass important information to the respective teachers.

## PARENT'S TALK

**S. PREMA,**  
**Parent of S. Dharshan,**  
**Grade - II**

My child enjoy the learning environment at school , where they are encouraging to be independent and take ownership of the work they enjoy classes going on field trips and planning and preparing for school event. My child is usually very eager to go to school. The school atmosphere and the friendly teachers are able to understand the various aspects of life I think my son has the mind set and the skill to face the challenges of the new future, the teaching methods and the excellent communication and relationship between the teachers and students, this type of learning makes more confidence and they are very ready to face the world. I feel the visible art music PET play every important role in the learning under the yearly celebration improve the self confidence. My child has improved his reading and writing he loves coming to School. All teachers at the school are really helpful and I feel that my child receiving everything from his school life.

Thank you.

## TEACHER'S TALK

### **G. SATHIYA** Social Science Teacher

Teacher Vision, we are invested in supporting teachers so that they can, in turn, help their students. So, we were naturally curious about what new challenges they might have faced in these years after of the pandemic and what they will be facing in future school years to come. Navigating a (not quite) post-pandemic educational landscape is not an easy task. Based on our most recent survey, we are moving in the right direction- but still have quite a way to go. The categories that require the most focus for the 2023 school year are academic, social/emotional, and teacher work/life balance, as the demands continue to increase without modifications to the time, it will require to address them. We remain committed to serving teachers in the ever-changing educational environment with materials and resources that support their growing needs.

I am very glad to be a part of Vidhya Nikethan Intel public school as science and social science teacher.

A good teacher understand the students mentality and teaches the level also. Teacher always encourage the students not only in academic side and in sports side also. They provide self confidence it is very useful to our future life . Our school conduct many activities and many programme in their academic year. Our school is the key for learning social and life skills. Our school understands the relationship between curiosity, enquiring, and lasting human change. Our school uses professional development designed to improve teacher capacity over time.
